Notes:

- ^a For operations where exposure potential is low (i.e. operations are infrequent using only small quantities of Cr(VI)), air emission abatement may not be required.
- ^b Total release per site of sites performing this use, with only a certain share generated by this use.
- ^c Gloves (tested to EN374), material and thickness depending on task, see WCS 1 4.

^d RPE according to EN 529:2005 is worn during all tasks involving solid chromates (measuring and weighing of solids and for bath emptying and cleaning) and for all tasks not performed under LEV for which industrial hygiene exposure assessment confirms RPE use is required: Half mask FFP3, half mask with P3 filter/P3 combination filter or full mask with P3 filter/P3 combination filter.
